

# The Story of the Frog

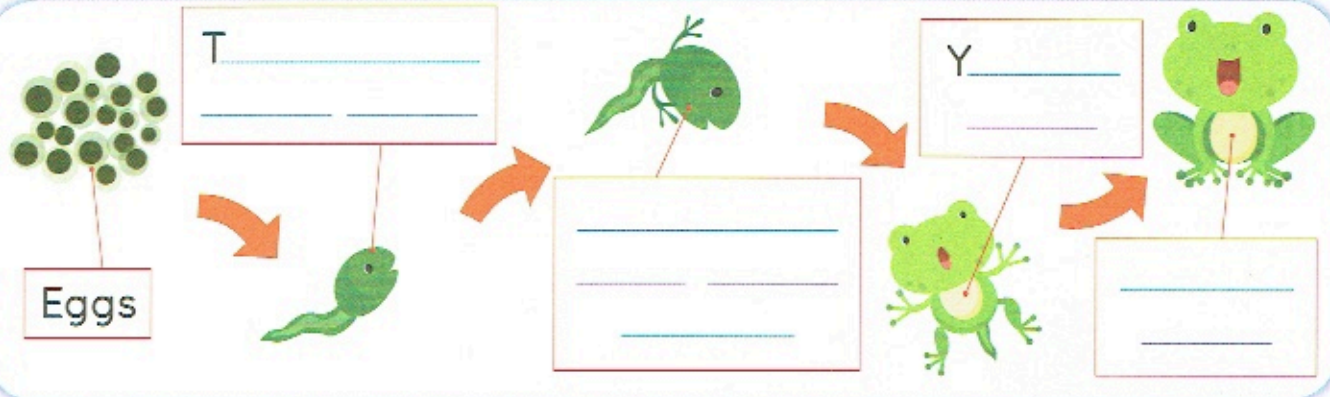

**A** Look at these five pictures. Write the correct label for each one.

Young frog

Adult frog

Tadpole with back legs

Tadpole with tail

**B** Use the word box to help you write the story of the frog.

gills

air

back

adult frog

front

eggs

young

tail

1. A mother frog lays her e \_\_\_\_\_. They are covered with clear jelly.

2. Tadpoles hatch from the eggs. They have g \_\_\_\_\_ to help them breathe under water. They also have a t \_\_\_\_\_.

3. The tadpole grows b \_\_\_\_\_ legs. Then the tadpole grows lungs. Lungs help it breathe in a \_\_\_\_\_, just like us.

4. The tadpole grows f \_\_\_\_\_ legs. Its tail becomes shorter. Now it is a y \_\_\_\_\_ frog.

5. The tadpole loses its tail. It has become an a \_\_\_\_\_ f \_\_\_\_\_. It can live on land or in water.

## Hot Science

A frog uses its sticky tongue to catch insects. Its long tongue comes out of its mouth and wraps around the insect. The frog's tongue then snaps back and throws the insect down its throat. Yummy!
